

Windows Movie Maker (Level 4B)

In this course, students will learn about the basic functions of Windows Movie Maker. This course mainly talks about the general functionalities such as installing windows movie maker, recording clips with your webcam, importing needed pictures, music, and videos, organizing your clips, inserting special effects into the clips, and saving your final clips in different formats. After taking this course, students will be able to go home and create their own video clip with their creativity and imagination!
